May 6, 2019

To the Hiring Manager,

As a Full Stack Web Developer currently based in Denver, CO, I create intuitive, functional, and innovative apps and websites. I have a portfolio of projects (including financial planners, event browsers, and general interest) that demonstrate many of the skills required for this role which I am happy to share with you.

As a recent graduate from the University Of Denver Coding Boot Camp, I am comfortable coding independently or in a group setting. I am confident in my ability to grasp new concepts quickly and to produce quality code under a constant cycle of deadlines.

My current employer is Vertafore, where I have worked as a Financial Specialist since May 2017. I joined the team shortly after a major relocation of the company headquarters and supported the transition into new workflows. My role has been to network with individuals and teams throughout Vertafore to maintain ongoing delivery of products, while at the same time ensuring accurate tracking of revenue. For the past two years I have helped to document, consolidate, and rewrite many operational processes for Vertafore's vast array of products and services. The evolution of my role has been both incredibly challenging and rewarding, and I am now eager for a new challenge.

My passion for creating robust yet simple solutions for complex problems has translated perfectly into the realm of coding. My work ethic, skill set, and approach to learning would enable me to hit the ground running at AllMEDx and make a valuable contribution as a Full Stack Developer. I look forward to hearing from you soon, and would welcome the opportunity to talk about how I could be a great fit for this role, the company, and the team.

Sincerely,

David Ellis
